

JOE KRAMER

Software Engineer

- ★ I have an affinity for all things art and engineering, but my expertise is in custom designing new enterprise level applications from scratch.
- ★ Well-rounded professional software engineer with over sixteen years of experience designing, developing, and maintaining diverse sets of technologies for small businesses, startups, and large international corporations.
- ★ Committed to meeting industry standards and best practices. Establishes processes, workflow, communication, and tools for an effective and efficient engineering team. Writes exceptionally clean and documented code.
- ★ Lifelong learner. Constantly researching and testing new technologies and processes.
- ★ Comprehensive understanding and experience of the complete life cycle of development: from discovery and business analysis, defining requirements and priorities, user experience design, full stack development, testing and debugging, to deployment of product releases.
- ★ Decisive leader of initiatives to promote organizational growth and optimal utilization of emerging technologies.
- ★ Excellent collaboration skills. Works great in small teams as well as individually and remotely. Helps teach and train others with valuable insight. Helps others troubleshoot coding problems and debugging.
- ★ Skilled in solving extremely complex logic problems in large systems as well as applying artistic visual qualities in extraordinary precision and detail.
- ★ Built enterprises from concept into production with millions of users.
- ★ Exceptional at finding and recruiting the best engineers, and building teams with a great culture.
- ★ Communication with clients to articulate and simplify complex technology, demo products, and assist with questions and integrations.

I'm currently open to **long term, 100% remote, Front End** and **Full Stack**, Software Engineer opportunities. I have been working in the technology industry for sixteen years and cultivated a variety of skills and picked up industry standards and best practices. My career has been **60% Front End** and **40% Back End** development. I love to write UI code and prefer to be an individual contributor in a large team. My thing is creating innovative, interactive, intuitive, and engaging **UIs** that people enjoy using.
