Software Engineer

Summary of Qualifications

- ★ I have an affinity for all things art and engineering, but my expertise is in custom designing new enterprise level applications from scratch.
- ★ Well-rounded professional software engineer with over sixteen years of experience designing, developing, and maintaining diverse sets of technologies for small businesses, startups, and large international corporations.
- ★ Committed to meeting industry standards and best practices. Establishes processes, workflow, communication, and tools for an effective and efficient engineering team. Writes exceptionally clean and documented code.
- ★ Lifelong learner. Constantly researching and testing new technologies and processes.
- ★ Comprehensive understanding and experience of the complete life cycle of development: from discovery and business analysis, defining requirements and priorities, user experience design, full stack development, testing and debugging, to deployment of product releases.
- ★ Decisive leader of initiatives to promote organizational growth and optimal utilization of emerging technologies.
- ★ Excellent collaboration skills. Works great in small teams as well as individually and remotely. Helps teach and train others with valuable insight. Helps others troubleshoot coding problems and debugging.
- ★ Skilled in solving extremely complex logic problems in large systems as well as applying artistic visual qualities in extraordinary precision and detail.
